

SHLOK GUPTA

Cybersecurity Engineer

+1(206) 609-4548 | shlokgupta261@gmail.com | [linkedin.com/in/shlokgupta261](https://www.linkedin.com/in/shlokgupta261) | shlokgupta261.github.io/ | Seattle, WA

SUMMARY

Security Engineer with 4+ years of experience in **cloud infrastructure security**, **threat modeling**, **risk assessment**, **incident response**, and **security compliance**. Proven ability to design and implement **security controls** aligned with **ISO 27001**, **NIST**, and **OWASP**, while integrating security into **CI/CD pipelines** and the **secure software development lifecycle (SDLC)**. Pursuing **M.S. in Cybersecurity Engineering** at the **University of Washington**.

EDUCATION

University of Washington <i>Master of Science in Cybersecurity Engineering</i>	Seattle, WA Sep 2024 – Jun 2026
Sushant University <i>Bachelor of Technology in CS, Specialization in Cybersecurity</i>	India Apr 2018 – Jul 2022

PROFESSIONAL EXPERIENCE

AI Cybersecurity Consultant (Internship) CyForte.ai	Jan 2026 – Present
- Reduced client alert fatigue by 70% by engineering AI-driven detection agents that correlate telemetry across CrowdStrike and Splunk, cutting average incident triage time from 45 minutes to 12 minutes. - Designed executive security dashboards mapped to NIST CSF and ISO 27001 controls, enabling leadership to track and remediate cloud misconfigurations across AWS and Azure hybrid environments. - Led threat modeling sessions using STRIDE and MITRE ATT&CK to identify 15+ high-risk attack paths in client cloud infrastructure, delivering prioritized remediation roadmaps.	
Information Security Analyst CSG	Aug 2022 – Sep 2024
- Aligned 70+ security controls to ISO 27001 and PCI-DSS v4.0 across 8 departments; developed security test plans and integrated automated checks into CI/CD pipelines, reducing release-blocking findings by 60%. - Achieved 100% audit preparedness ahead of schedule by coordinating 5 simultaneous security audits and standardizing 20+ control narratives, eliminating documentation bottlenecks. - Saved 50+ hours per quarter by building a Python-based compliance automation dashboard that increased security control test coverage by 40% and replaced manual Excel reporting. - Reduced security incidents by 35% by creating an IT risk register and driving cross-functional alignment between GRC and engineering teams to accelerate remediation SLAs.	
GRC and Threat Intelligence Intern SAFE Security	Jul 2021 – Aug 2022
- Executed risk assessments and validated 30+ security controls against ISO 27001 and NIST 800-53, improving the organization's compliance posture score by 20% in quarterly reviews. - Analyzed real-world breach cases and IAM misconfigurations to produce threat intelligence reports, improving remediation turnaround by 25% for the engineering team. - Performed vulnerability assessments on web applications using Burp Suite against OWASP Top 10; supported 4 audit cycles and coordinated remediation across cross-functional engineering teams.	

TECHNICAL SKILLS

Security Skills	Vulnerability Research, Penetration Testing, Code Audit, Fuzzing, Exploit Development, PoC Development, Bug Detection, Static & Dynamic Analysis, Security Design Reviews, Security Code Reviews, OS Security, Network Protocols, Cloud Security, Application Security, Threat Modeling, Secure SDLC, Mitigations & Hardening, Zero Trust
Frameworks	OWASP Top 10, NIST 800-53, ISO 27001, MITRE ATT&CK, CWE/CVE, PCI-DSS 4.0, CIS Benchmarks
Tools & Platforms	SIEM/SOAR, CrowdStrike, Burp Suite, Ghidra, IDA Pro (familiar), Git/GitHub Actions, JIRA, CI/CD Pipelines, Linux, Windows (kernel fundamentals, architecture), AWS (Guard-Duty, CloudTrail, Security Hub, IAM), Docker, VMware, Virtualization Technologies
Languages	Python, C/C++, Java, Bash Scripting, x86 Assembly (familiar)

PROFESSIONAL CERTIFICATIONS

IRCA / IEC: ISO 27001:2013 ISMS Lead Auditor	CompTIA: Security+
IRCA / IEC: ISO 27701:2019 PIMS Lead Auditor	CompTIA: A+

RESEARCH & TECHNICAL PUBLICATIONS

- Vulnerability Analysis of Android Health Apps** (2025). Focused on applying Machine Learning models and data analysis techniques to analyze software vulnerabilities.
- Vulnerability Analysis and PoC Development for LightSpeed Cache Vulnerability (CVE-2020-29172)** (2022). Explores a Stored XSS vulnerability in the LiteSpeed Cache plugin for WordPress, demonstrating practical exploitation through un-sanitized IP fields and proposing technical remediation strategies.
- Top Web Application Security - Threats & Standards** (2021). Analyzes the OWASP Top 10, WASC risk assessment, and SANS CWE 25 frameworks, detailing the exploitability, technical impacts, and preventive measures for critical web vulnerabilities.
